EDUCATION

Oregon State University   exp. 2025
Bachelor of Science in Computer Science

San Francisco State University   2010
Bachelor of Arts in English Literature

COMPUTER SCIENCE PROJECTS

Combat Tracker   2024

- Created a stateful React app for managing tabletop RPG combat encounters, tracking initiative (fighter turn order) and each fighter's health points.
- Made using Node.js and React.

DreamOffer   2022-2023

- Collaborated with another student to develop a web app to help job applicants keep track of where and when their job applications were submitted.
- Designed entity relationships and schema for the project's database.
- Built using HTML, CSS, JavaScript, Python, Flask, MySQL.

Workout Log   2022

- Developed a web app to track exercises completed by a user.
- Engineered a REST API that supports CRUD operations with a React UI using the model-view-control software design pattern.
- Created using the MERN stack (MongoDB, Express.js, React, Node.js).

Python Battleship   2022

- Programmed and tested a Python program that allows two people to play the game Battleship.
- Implemented a grid-based GUI using the Tkinter package to improve the user experience.

SKILLS

Programming Languages: Python, JavaScript, SQL, HTML/CSS
Frameworks/Libraries: React, Express.js, Flask
Other Technologies: Node.js, MongoDB, MySQL, Git, Visual Studio Code

WORK EXPERIENCE

CodePath - *Tech Fellow*   current
Ferndale Library - *Page*   current
Bellingham Food Co-op - *Lead Cook*   2015-2020
Whatcom Day Academy - *Assistant Teacher*   2013-2014
